Summary

Mobile Developer with over 7 years of experience in designing and delivering applications for iPhone, iPad, and macOS. Skilled in Swift, SwiftUI, UIKit, MVC/MVVM, Core Data, CloudKit, Java, Kotlin, Jetpack Compose, REST APIs, Git, and Google Services (Maps, Firebase, Analytics, and Firebase Cloud Messaging). Proven track record in building scalable apps, integrating third-party APIs, and collaborating with cross-functional teams to deliver high-quality software with reliable unit-tested code. Additionally brings 2 years of teaching experience instructing undergraduate and technical students in software development, AI, and systems fundamentals.

Core Skills

Swift • Objective C • SwiftUI • UIKit • MVC / MVVM • Core Data • MapKit • CloudKit • Java • Kotlin • Jetpack Compose • REST APIs • Git • Google APIs (Maps, Firebase, Analytics, Firebase Cloud Messaging) • Unit Testing • AI-Assisted Development (Copilot, Gemini, Claude)

Experience

iOS Developer
Connecting Spaces – Remote | November 2025 - April 2026

- Maintained and enhanced a mission-critical iOS safety application, supporting trip logging, live GPS tracking, and automated welfare alerts.
- Fixed production bugs and delivered incremental feature improvements across trip monitoring, scheduled safety check-ins, vessel profiles, and emergency workflows.
- Maintained real-time maritime weather, tide, and sea condition data using WillyWeather APIs.
- Diagnosed and resolved critical authentication and state management bugs (e.g., Bearer Token refresh issues) that disrupted profile creation and backend synchronization.

iOS Developer
Swiftly Developed Business Process Outsourcing – Remote | Mar 2023 – August 2025

- Help developed a cross-platform CRM application for iOS, iPadOS, and macOS.
- Built the UI using SwiftUI with a scalable MVVM architecture.
- Implemented persistent data storage using Core Data.
- Wrote unit tests to validate business logic, improve reliability, and maintain code quality.

Part-time College Instructor
University of Mindanao – Davao | Feb 2023 – Jun 2023

- Taught Software Development, Introduction to Artificial Intelligence, and Introduction to Operating Systems.
- Covered programming languages and frameworks including Java and Python.
- Introduced students to core architectures and distributions across Windows and Linux operating systems.
- Guided students through foundational Artificial Intelligence concepts and practical implementations using Python.

iOS Developer
QuickReach Inc. – Remote | Nov 2022 – Mar 2023

- Built new UI screens for a no-code-based construction management platform iOS app to manage and display loan details.
- Added a signature upload feature integrated with the device photo gallery.
- Implemented a push notification system to alert users of important updates and announcements.
- Resolved critical UI bugs in file attachments and record selection menus.

iOS Developer
WestActon Inc., Tokyo – Remote | May 2021 – Mar 2023

- Maintained and enhanced hybrid iOS apps using Swift, Objective-C, UIKit, MVC, and WebView.
- Integrated Google Maps SDK for location-based features.
- Implemented Firebase Cloud Messaging for push notifications.
- Added Firebase Analytics to track user behavior and app performance.

iOS Developer
CARVE Business Management Services – Remote | May 2020 – Jun 2021

- Developed a video chat application using Twilio Messaging APIs.
- Implemented real-time communication features for messaging and video.
- Built the user interface using UIKit with MVC architecture.
- Optimized app performance and usability for a smooth user experience.

iOS Developer
IdeaHub IT Solutions – Davao | Oct 2019 – Apr 2020

- Enhanced an existing real estate iOS application with new feature implementations.
- Improved user interface and user experience using UIKit.
- Maintained and extended the codebase following MVC architecture.
- Fixed bugs and optimized app behavior to improve stability and performance.

Web Developer
Dr. Benedict Valdez of Trans ALS Med and Associates – Davao | Apr 2018 – May 2018

- Developed a blog platform for his Land, Air and Sea Emergency Medical Transport company using OctoberCMS.

Web Developer
Dr. Benedict Valdez of Maharlika Charity Foundation – Davao | Nov 2018 – Dec 2018

- Developed a blog platform for the SPMC Emergency Department using October CMS.

Web and Android Developer
911 World Inc., Canada - Remote | Feb 2018 – Aug 2018

- Maintained and extended the company's core Google Maps–based asset-tracking system.
- Implemented new features and fixes across both Android and web platforms.
- Worked on the Android app using native Android development.
- Contributed to the web application built with PHP and CodeIgniter.

Android Developer
Logimine Asia Inc. - Davao City | Apr 2017 – Oct 2017

• Maintained and enhanced the company's primary Fleet Management System built with Java EE.

• Implemented bug fixes and feature updates to improve system stability and performance.

• Developed a Geographic Information System (GIS) Android application.

• Integrated map and location features using the OSMDroid library.

IT Instructor
AMA Computer Learning Center - Davao City | Nov 2015 – Apr 2017

• Taught Software Development and Web Application Development courses.

• Covered programming languages and frameworks including Java (JavaFX), C/C++, C#, HTML, and PHP.

• Instructed students on database design and management using MySQL and MS SQL.

• Guided students in developing practical, hands-on software and web applications.

Desktop Software Developer
Davao Central Warehouse Club Inc. - Davao City | Nov 2014 – Jun 2015

• Maintained and supported legacy applications written in VB6.

• Developed new modules using JavaFX with FXML for UI implementation.

• Ensured integration between legacy systems and new JavaFX components.

• Improved application functionality, performance, and maintainability.

Education

Bachelor of Science in Information Technology – University of Mindanao, 2013

Master in Information Technology – University of Mindanao (Ongoing)

Certification

MTA: Database Fundamentals (Microsoft, 2017)
